SOLLOGS DATA EXCHANGE

Integrated Smart Tool

Container DataEx Tool

www.sollogs.ae

HOW TO ACCESS THE CONTAINER DATA EXCHANGE TOOL ?

1. Visit www.sollogs.ae
2. Sign In to your account
3. Go to Pricing > Plans & Pricing
4. Choose the payment plan of **SDEX Product** that suits you, and Subscribe to it

Now, Users can easily access the **CONTAINER DATAEX TOOL** through the following three simple ways :

- a. Go to Portal's Home Page and Click on "CONTAINER DATAEX TOOL"
- b. Go to E-Products > SDEX (Sollogs Data Exchange) and Click on "CONTAINER DATAEX TOOL"
- c. Go to User's SDEX Tools and Click on "CONTAINER DATAEX TOOL"

Note : Only Subscribed Users In the sollogs portal will be able to access SDEX Tools.

HOW TO USE THE CONTAINER DATA EXCHANGE TOOL ?

1. Click on the "Browse for file" Button to Upload the filled container Input form (Excel File)
3. Click on the Valldate Button to verify the details of the container Input form as per Customs requirements
4. Download your output file to upload the container details on the Dubai Trade Portal

Note : The Container DataEx Tool is uniquely designed to validate the container details as per the requirements of Dubai Trade Portal and Dubai Customs. If the Valldate button does not turn into a Download button after clicking on it, kindly check the remarks column for validation errors.

WHAT IS A CONTAINER INPUT FORM ?

A **Container Input Form** is a form (or a file, such as an Excel File)

By uploading this form in the Container DataEx Tool of SDEX, Users can quickly create an output file (*.txt) format.

This format is used to upload the container details on the Dubai Trade Portal

HOW DO I ENTER THE DETAILS IN A CONTAINER INPUT FORM ?

1. There is one sheet in a Container Input Form, named "CD"

a. Container Detail (CD) sheet is specially designed to upload the details of the container on the Dubai Trade Portal

2. In the Container Detail Sheet, entering the details of each row is considered as the details of a single container

To Enter Container Information	
Container Number	Enter the container number as provided by shipping line (This is obtained from Bill of Lading)
Container Size	Enter the size of the container such as 20' or 40'
Container Type	Enter the type of the container such as Standard, Reefer, Dry etc..
Seal Number	Enter the seal number used to seal the container (This is obtained from Bill of Lading)

Note : Users can enter the details of multiple containers in a single form for uploading multiple containers at a time on the Dubai Trade Portal

HOW TO DOWNLOAD THE CONTAINER INPUT FORM ?

1. Go to User's SDEX Tools > Download Center

2. Click on the "Container" button to download the template of the Container Input Form along with the Code File and the Read Me File

Note : 1. Click on the third row of the container input form (excel file) and read the description of each field to fill out a form without any errors
2. Refer to CNTR-Code File for entering the Container details in the Container Input Form without any errors
